

Cabin Flexibility

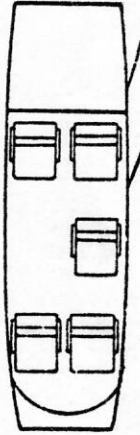

In addition to the standard S-1 interior, Shrike also offers 10 optional seating plans, with space for up to seven persons. Shrike is the only aircraft in its class available with an optional luxury interior, the leather El Cid II.

For cargo transport, Shrike seats are easily removed from their continuous tracks, and replaced with cargo hold-down straps.

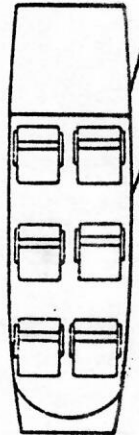

Weights shown are to be added to the standard interior. Headrests are mandatory on all facing seats, per Civil Air Regulations. All facing seats are available for all center cabin seat positions.
