Winter covers	Magnum 1 tail ski	Airglas LW-3600 penetration skis
Cleveland wheels & brakes	CAP 3000E floats w/hatches	P Ponk (McCauley) 3-blade

Very nice bones! This is an original, COMPLETE LOGS, NO DAMAGE, later model Cessna A18F with factory float kit and phase-4 VAR crank motor. These aircraft are skyrocketing in value. Perfect candidate to let a buyer pick out their own STOL modifications, paint scheme, interior, and avionics package. A factory new motor was installed in 2006 with a re-certified engine mount, new engine instruments, fluid lines, controls. Also received a factory new propeller and overhaul governor. New seat rails in 2010. Call your mechanic and get your pre-buy scheduled because this aircraft will not last.
